

# DIGITAL FOOTPRINT REVIEW

Identify Individual Cyber Risk Exposure

As cybercriminals increasingly target high-profile individuals and their close contacts, safeguarding personal and professional digital footprints has become crucial. Executives, public figures and VIP's face risks from their expanding online presence, including sensitive data exposure, social media compromise, and targeted phishing attacks.

Our Digital Footprint Review identifies the information available about key individuals and any exposures that may exist. Understanding this information is crucial for building your threat profile, allowing you to invest in the right security controls to mitigate potential risks.

## Key solution benefits:

### Uncover Threat Exposure

Build a clear understanding of the information accessible to potential threat actors targeting you. This insight is crucial for protecting personal safety.

### Adopt an Attacker Mindset

We explain how and why attackers collect information about you and the methods they might use to exploit it. You will gain valuable knowledge to anticipate and counter potential threats.

### Tailored Threat Recommendations

Receive personalised advice on how to reduce your digital footprint exposure, identify risks and defend against threats.

Our assessment is conducted from the perspective of malicious actors, ensuring you have the tools and strategies needed to proactively defend against potential threats. And for those seeking the highest level of protection, customisation and peace of mind, our **Digital Footprint Review PLUS** offers a deeper, more robust, personal approach. This service extends the standard review with advanced analyses and security enhancements through comprehensive security assessments, tailored to address a wider range of risks, including those related to travel, smart home devices, and cloud security.

## Digital Footprint Review

Our standard service offering includes:

### Detailed Analysis:

Conducting thorough searches of data breach sources for specific credentials (usernames and passwords).

### Locating & Flagging Sensitive Information:

Identify and secure leaked personal details to protect your privacy online.

### Protecting Your Family:

Safeguard your family by uncovering online risks and exposure of their sensitive information.

### Securing Your Home Address:

Find and remove publicly accessible details of your home address for safety.

### Auditing Your Online Accounts:

Review accounts for vulnerabilities, weak passwords, and potential security risks.

## Digital Footprint Review PLUS

Our plus package includes everything from the standard review, with additional features and benefits, delivered in a direct consultation with a Senior Advisor. This in-depth session includes:

**Identity Protection:** Identifying any existing accounts that may be vulnerable to identity theft.

**Social Media Security:** Ensuring your social media profiles are properly secured.

**Network Security:** Reviewing and strengthening settings for your broadband, network, and Wi-Fi.

**Security Behaviour:** Offering customised travel security advice and best practices.

**Mobile Device Security:** Optimising security settings on your phones and tablets.

**Smart Home Device Security:** Securing smart home devices, including Amazon Echo and other connected appliances.

**Effective Security Practices:** Implementing practical measures such as password managers and multi-factor authentication.

**Cloud Service Security:** Improving the security of cloud services like Dropbox and Evernote.

**Account Monitoring:** Advising on methods to monitor accounts for signs of potential attacks.

Reporting and recommendations are then offered in-person at your chosen location, providing a comprehensive, personalised and secure digital footprint experience.

## Who is this most suitable for?

-  **Executives and high-profile individuals**  
High-profile individuals looking to securing their digital presence, close contacts and related assets.
-  **Security and personal protection teams**  
Tailored risk assessments and proactive monitoring designed specifically for VIPs.
-  **Family offices and advisors**  
Family offices safeguarding assets and reducing risks to personal and professional reputations.
-  **Legal and compliance professionals**  
Enhanced data protection and regulatory compliance support with a focus on personal security.

## Why NCC Group?

With over 25 years of cyber security expertise, NCC Group is a trusted partner for high-profile individuals and global organisations seeking to safeguard their most sensitive information. Our Digital Footprint Review services offer personalised threat insights tailored to individuals, with end-to-end cyber capability to improve resilience. By partnering with us, you gain the assurance of robust, bespoke security solutions designed to stay one step ahead of potential threats.

Best in class partner alliance ecosystem for end-to-end cyber security support

2,200+ in-house cyber security specialists

Committed to investment in research and sharing of threat intelligence

Highly experienced consultants certified by the National Cyber Security Centre (NCSC), GIAC and CREST

Sector embedded knowledge and expertise in securing IT and OT infrastructures

Trusted Digital Forensics and Incident Response partner able to support with breach response, management and investigations
